

Ebook

*Animal
Communication*

in 5 steps

Mirjam Diepenbrock

PREFACE

It is with great love that I present this ebook: 'Animal Communication in 5 steps'.

I am convinced that we can all communicate with animals telepathically, it is an Universal language. Every animal that comes on your path has a voice, is open to share its wisdom and willing to develop your intuitive skills.

In this ebook you will learn how to take the first steps in your intuitive development.

Long time ago in 2002, I was overstimulated by my work as a marketer at a large organization. For a half a year I was sitting at home, with the doors shut and hoping to get aligned with my head, feelings and body. This situation forced me to take another step and had to let go of the idea of becoming a career woman. I completely made a life changing move. Animals showed me the way.

I started developing my intuitive skills and noticed that I had healing powers. All kinds of animals crossed my path and people were asking me to help them with mental, emotional and health issues of their pet and later on with themselves. Along the way I have learned how to communicate with animals. These new insights led me to teach this universal language too. My more than 20 years of experience in animal reading and healing lead to online courses in animal communication and healing. In April 2022, my first book was published; "The thin line between life and afterlife" and has been translated into English in 2024.

Many animals and their owners have inspired me to share the animals' wisdom and each story is unique and special. I share my life experiences with animals and my own journey as a sensitive soul about love, openness and vulnerability.

" I wish you an inspired journey in which you take your first intuitive steps together with animals "

INTRODUCTION

Animals always radiate something magical. Their wisdom, unconditional love and liveliness make me feel more complete as a human being. But what if your animal withdraws, starts biting, becomes sick or out of control? What if your vet or animal behaviorist can't figure out a solution for you and your pet? What to do?

Intuitive communication offers many insights and possible solutions to misunderstanding, fear and illness. This ebook can also support you when getting stuck in training, not getting back the love you put in, saying goodbye to your animal and many other problems.

Developing to communicate telepathically with animals is based on (re)discovering your intuitive skills. Loving and vibrational power are tools to let the words, feelings and invisible images of animals come to you.

Follow the 5 basic steps playfully. Look with an open mind in to it and be grateful for every signal you receive.

I believe you can do this too!

*"Give every day the chance
To become the most wonderful person of your life"*

WHAT IS TELEPATHIC COMMUNICATION?

Many people already consciously or unconsciously communicate with animals from their imaginations, body energy, through their hearts or simply through their voice and words. Telepathy literally means 'remote sensing'. Everything in this life is energy where distance is not an obstacle in connecting to one another.

TELEPATHY IS:

- ✿ A form of communication from feelings, images, words, smells and power of thoughts
- ✿ A non-visible transmission of energy between humans and animals on Earth and in the Afterlife
- ✿ A frequency, a vibration, an wave of energy from soul to soul; in physical contact or more remote
- ✿ It is a limitless contact from heart to heart and soul to soul

TELEPATHY IS NOT:

- ✿ A puppy training, riding lesson or other type of training where you have a goal in mind or want to motivate or train an animal
- ✿ When you reward your animal for the behaviour you want to see such as a 'treat'
- ✿ Socialising animals
- ✿ Encouraging obedience
- ✿ A small talk with an animal what you do with a human friend
- ✿ Improving movement and agility

DEVELOPING INTUITIVE SKILLS

Besides our five senses: seeing, hearing, tasting, smelling and feeling, we also have our sixth sense. This sixth sense - your inner knowing - comes from within but is not tangible or scientifically explainable (yet). Most people do not trust their own intuitive abilities. Yet we use them daily on a subconscious level. But how can we use these skills to open a gateway for telepathic communication with animals?

WHAT IS INTUITION:

- ✿ Intuition is a kind of 'knowing from your deepest inner self'. It goes beyond rational thinking. You can't explain it.
- ✿ The very first spontaneous feeling you experience in your body, it is a sensation, a sudden emotion like goose bumps.
- ✿ It is not the same as a feeling. That can be coloured by beliefs, fears and ego and therefore is not always pure or truthful.
- ✿ With intuition, you overcome limiting feelings and listen directly to your soul, your heart and the Source.
- ✿ Your intuition is your sixth sense. It is connected to your subconscious which is in contact with Universal Wisdom.

There are six ways to make contact with your Universal Wisdom. Read on!

DEVELOP YOUR INTUITION IN FIVE STEPS

1. **Living more mindful** by being aware of all your emotions, thoughts and wellbeing.

2. **Letting go** of old patterns by genuinely looking in your own mirror of self reflection. What suits you and what doesn't. What has served you but no longer suits you.

3. **Focus on the NOW.** Focus on what you can do now and how you are feeling. Become softer in your body and thoughts through meditation and breathing.

4. **Ground yourself** by stepping into your earthly power. Feel you are like a tree, deeply rooted in the earth. Dare to stand your ground in this life. Dare to make decisions.

5. **Heart consciousness** by merging unconditional love, love for yourself and another. Let your vulnerable part flourish. You are worth it.

“There is no perfect moment for pure love. It happens unexpectedly in a hundredth of a second”

GET STARTED

Would you like to develop your intuition and learn how to use it when communicating with your animal? Then register for the online course 'basics in animal communication'. You can also book a consultation/ a reading with me or my team.

COURSE

🍀 Basics in Animal Communication:

Develop your intuitive skills for a deeper understanding of what animals feel or show. A down-to-earth course that will broaden your perspective on how to communicate with your heart, head and soul. This course is especially for sensitive animal lovers, dog and horse trainers, coaches, animal healers, therapists or caretaker.

[Book your course here](#)

CONSULTATION

Without too much information beforehand and by means of a picture of you and your animal, I dive deeply into the animal's soul and energy. I give my observations on the animal's body, feelings and environment. I am guided by the ever-flowing universal energy. I am to-the-point, loving and have an earthy connection with humans and animals. I also make contact with animals in the After Life, which is my speciality. This consultation will take place during a telephone conversation, a Zoom call or written email.

SPECIAL STORIES

CHICKEN KATRINE

Surely, my first spectacular encounter was with a chicken. Can you imagine I have had set my intention on horse healing and my first real client was a chicken! Making this connection gave me the best endorsement ever about being blessed to do this work. Katrine - a chicken with two splayed, almost lifeless legs - could no longer walk and could not eat and drink independently. After my first healing, she was able to drink and eat independently again but still needed regular support. After my second healing, she started 'walking' again. She could use one paw completely at first and was able to 'walk' with it. She used the other paw to support herself and even that one she could eventually place completely under her body again. The icing on the cake is surely that after a while, she started using the 'paralysed' paw completely again too. She walked on both legs again and the difference with the normally walking chickens was nil!

SPECIAL STORIES

CAT SNOWY

Snowy's head was full of wounds. The owner had tried everything: fungal treatment, antibiotics, natural creams, various kinds of food (including hypo allergenic), injections against itching, keeping her inside the house, de-fleaing, etc. Nothing helped. The vet was almost certain: it's a food allergy. Snowy was a playful cat, but there was little left of that. She still slept very peacefully, though. And the owner thought that was strange: that she didn't wake up from the itching. If only Snowy understood that she should not scratch so much so that her wounds could heal and her head cap could come off. These and many other questions the owner had because - after everything she had tried - she didn't know what to do anymore and felt so sorry for her young cat. A few days after the consultation/reading, the owner responded very enthusiastically: "Snowy is doing much better. I can even take her cap off for a while! The scratching is a lot less. We also try to distract her when she starts scratching. I treated her neck wounds with lavender water and she was less itchy as a result. The wounds no longer looked so irritated. I placed the recommended gemstone 'amethyst' in her basket; she tips her head against it all the time. She was no longer dull and/or sleepy. The nutritional advice also went well. She was sleeping peacefully and played vivid again."

SPECIAL STORIES

TINKER FOAL

A Tinker foal, daughter of a Tinker mare and a Peruvian Paso stallion, suffered from diarrhoea. She was wormed and the owner removed all manure from the field on a daily basis to keep the worm infection as low as possible. The other horses were tested for worms every other month through a test. Despite this professional guidance, she continued to have diarrhoea. The owner contacted me after other natural treatments but couldn't find out what to do with the foal. The moment I sat with the foal's photo in my hands, I caught sight of a boisterous and joyful frolicking foal before my mind's eye. The owner smiled and saw her foal doing at that exact moment what I just said. The foal indicated to me that she had become sick via her mother and the mother's milk. Her mother was immune to the infection but she was not yet. The remote healing ensured she was diarrhoea-free the next day and for the following weeks. The owner had looked up the necessary information and confirmed that the mother had transmitted an infection through the mother's milk. I myself had no medical knowledge about this.

A telepathic consultation can give you a lot of insight and works synergetic with a vet and natural supplements.

WHAT CLIENTS SAY

'Mirjam, I am so happy that Brad is eating again after our consultation yesterday and it has had a positive effect on myself as well. I am getting back to work on my plans! My thanks again, Mirjam!'

'Muck is peeing in the litter box again and I don't worry or feel stressed anymore. Besides her, you helped me too'.

'Binky was really very relieved and full of energy today. As if a 'load' had fallen off her shoulders.'

'My grief was huge but your soothing guidance and the insights were magical. Now we have been able to give our grief it a beautiful place! Grateful!'

'Rehoming was actually the last refuge for my cat. But your reading and the supplements we have ordered gave the solution. We are still very happy together.'

ABOUT MIRJAM

The love for animals was instilled in me from an early age. I grew up with several animal species and always had an animal friend around.

At the age of 8, I barely escaped death by being kicked in the face by a horse. Just before I awoke with a bleeding face and broken jaw, I entered a tunnel. A tunnel of light that led me to another dimension. At the end of this tunnel, I saw my deceased grandmother and many more beautiful light souls.

At the age of 30, I had a burnout and quit my well-paid job. I became a mother of a beautiful son, which was also a miracle because I couldn't actually get pregnant. In 2007, we moved as a family from the Netherlands to the South of Spain.

In 2017, as a single mother, I started pursuing my path in self-love. I still live with my horses, dogs and cats alone in a vibrant rural area in Malaga province.

The roads with bumps and potholes have led me over more than 50 years of my life, more and more towards my soul mission. My first book 'The fine line between life and the afterlife' was published in Dutch in April 2022. In 2024 it has been translated into English.

ABOUT THE ANIMAL SOUL ACADEMY

The 'Animal Soul Academy' is a creation from my diverse experiences with humans and animals. It is a platform for sensitive animal lovers who want to develop their own healing and/or intuitive gifts, or come to spiritual blossoming themselves through animals.

Soul stands for soul connection with and between animals. This is the starting point of the Academy. The starting point for beginning the journey through the Academy. Coming back home to yourself, your own wellbeing, your own truth, your own soul and your own life's happiness. That's what this is all about. It's not about becoming an accomplished healer or animal interpreter, but it can be done.

Hence, the Animal Soul Academy aims to inspire and motivate animal owners, animal lovers, animal caretakers, animal coaches/therapists/instructors and people who are open to learning from animals in a spiritual way.

It's about your own personal and unique journey with and through animals. That animals help, guide, comfort and heal you where you need it and vice versa.

*"Forget what hurt you
but never forget what it taught you"*

REFERENCES

March 2020 felt like an adventure I was about to discover my own intuitive power. I won't forget my first conversation with Mirjam! Since then, it has been all magical and enjoyment! So much has happened.... Mirjam, so many thanks for what I have received from you! Your courses, all your loving response to my writing, your trust and everything else! And your non-judgement, because that is what made me flourish! All my life, everyone judged me. Because I was different and they didn't know how to deal with that. So they judged me. Well, I only discovered that later, of course. Everything I experienced that year seemed out of line. Thanks to you, now I have the confidence to communicate with animals and help their caretakers."

Pat Vink - animal communicator

"The course helped me to reconnect with what is close to my heart and from there I took my own unique path. Mirjam's wonderful personal guidance and the messages the animals gave me during the exercises made me feel supported and inspired to become myself and dare to trust my intuition. What an enrichment to be able to contact animals and humans like this! One of the nicest things I have given myself."

Jean Thomas

"I want to thank you for the beautiful consultation and your shared wisdom, it has helped me during a difficult period in my life to find the peace to re-focus. I believe the role of animals will become increasingly important during these vibrant times. Animals are the ones who can support and teach us. They are the ones who can hold the mirror up to us. Animals are our masters!"
